DETAILED ACTION

The preliminary amendment filed 4/12/04 has been entered.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 34-42, 44-45, 47-48 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 34-42, 44-45, 47-48 all depend from canceled claims.

Specification

3. The abstract of the disclosure is objected to because it unclear what the "tapered plug" is related to. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 33,43,46 and 49 are rejected under 35 U.S.C. 102(b) as being anticipated by Ernst et al. (US 5816759).

Ernst et al. discloses a bolt and anchor assembly comprising an elongated bolt (20,22), a shell (30), expansion member (40), a support device (shell support) (29), engagement

between said support device and said shell sequentially forces said shell into said expansion member to expand said shell to anchor said elongated in said associated bore hole (see col. 4 line 60+, col. 5 lines 1-16, col. 7 lines 1-10) and then allows axial movement of said support device in a direction toward and relative to said shell (see abstract, col. 4 lines 10-50, col. 7 line 5+). Base ring (32,33), fingers (35). Tapered surfaces (28,23, see Fig. 4) for both the support device and shell. Notch (36).
